AFFIDAVIT OF T Filipei

State of California

Sonoma County

I, T Filipei, attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is T Filipei . My address is PO Box 180 Duncans Mills, CA 95430.
2. I am a Web specialist with an electronics background.
3. The Commission's RF safety rules are inadequate because the rules are based on physics rather than biological studies.
4. **Biological cell metabolism uses electromagnetic energy in many ways, low level non-ionizing radiation can be disruptive to cell function. This needs to be determined before leasing more RF spectrum for communications.**
5. Finnish cell phone studies have shown microwave RF non-ionizing radiation to be a health concern for their public.
6. To address RF safety, the Commission has proposed (and should ethically) amend its rules "to ensure that the public is appropriately protected from any potential adverse effects from RF exposure." Proposed Changes in the Commission's Rules Regarding Human Exposure to Radiofrequency Electromagnetic Fields, ET Docket No. 03-137, Notice of Proposed Rulemaking, 18 FCC Rcd 13187, 13188 ¶ 1 (2003).
7. **Please instead direct mandate and resources for increased and enhanced communications for the public in the area of Fiber to the home. Then each citizen can decide if they prefer wireless or wired connections on the last leg.**

Respectfully submitted by

T Filipei
